

# Appendix C

## Integrated Highway Works Programme 2003 / 2004 District - listed by Programme, Sub-Programme and Town

The following report lists all projects contained within the Integrated Work Programme that is submitted to Cabinet for confirmation of funding in the 2003/04 financial year.

The Report is sorted in the following order

District  
    Funding Programme  
        Funding Sub Programme  
            Funded Projects (including Carry-over projects)  
                Town  
                    Projects are listed in alphabetical order  
            Reserve Projects  
                Town  
                    Projects are listed in alphabetical order

Funded projects are those projects that are high enough up the priority order within a funding sub-programme to be able to be funded in the 2003/04 financial year.

Reserve projects are those projects which are not high enough up the priority order to be funded at this stage, but which may be able to be completed if additional funding comes available during the financial year, from several situations

- an increase in funding level
- because funded projects are completed at a cost lower than their current estimates
- funded projects get delayed by circumstances not foreseen at present.

(Reserve projects are shown beneath a *Reserve Projects* heading, with an "R" in the left Margin of the report)

A glossary of some of the terminology in the report follows

- STSM – Short Term Structural Maintenance, includes surface dressing and other thin surfacings
- LTSM – Long Term Structural Maintenance, include treatments which re-establish the strength capacity of the carriageway
- Footway (High) – projects on footways which are termed 'high' in the HCC hierarchy
- Footway (Low) - projects on footways which are termed 'low' in the HCC hierarchy
- Speed Camera Hypothecation – programme of establishing speed cameras throughout the county, funded by the Safety Camera Partnership
